

Datasheet HTFMA-180.161

Articlenumber: G8000422

Radio heating actuator for radiator valves

Wireless actuators (wireless heating controllers) which, in conjunction with alre wireless room temperature sensors, realize individual room temperature control. Mainly used in renovation projects or for heating system extensions. 1-channel radio temperature actuator for radiator valves. Adapter for Danfoss RA, RAV, RAVL included in the scope of delivery.

Ambient temperature	0 ... 50 °C
Bearing temperature	-20 ... 50 °C
Colour	Pure white
Cooling control function	No
Dimensions (W x H x D)	48 mm x 75 mm x 64 mm
Electric connection	Other
Heating control function	Yes
Housing material	Plastic ABS
Max. air humidity (non-condensing)	95 % r.H.
Montage/Befestigung	M30x1.5
Nominal closing force	100 N
Nominal stroke	5 mm
Operating voltage	2 x Micro AAA, 1.5 V
Operation	Internal setpoint adjuster
Potential free switching contact	No
Protection class	III
RAL colour number (similar)	9010

Safety and EMC	In accordance with DIN EN 60730
Sensor element	NTC internal
Surface finish	Matt
Switching differential	0,5 K (delta T max. 4 K/h)
